### Professional Experience

---

10/2020 – present  
Weiterstadt, Germany

#### Software Developer, SV Gebäudeautomation GmbH

**Technologies:** Javascript, HTML, CSS, React, React Native, NodeJs

- Lead developer of a cross-platform mobile project that is currently being developed to control smart home systems.
- Short term web projects with React.

08/2020 – 09/2020  
Ankara, Turkey

#### Software Engineer Intern, Türk Telekom

Chance to work with two separate teams:

- A team with other interns and the goal is to improve Türk Telekom's call center with possible improvements on technological channels of the company (web sites, mobile apps, etc.) with the help of broad market research.
- With the other team, I had the chance to give support to the Yaay  social media app on the architecture area.

07/2020 – 08/2020

Ankara, Turkey

**Software Engineer Intern, Havelsan** [↗](#)

**Technologies:** Javascript, HTML, CSS, SAPUI5, Nodejs, Express, MongoDB  
Developing a full-stack web application for TCDD (Turkish State Railways) to order, track, and change the carriage requests.
